

Name _____

Age _____

Today the weather looks the most like

(circle one):

Mapping your habitat

A **habitat** is the natural environment where an organism lives.

An organism's habitat must have **FOOD, WATER, SHELTER,** and **SPACE.**

Can you find these elements in your habitat?

Instructions:

Using the back of this page and a pen or pencil, go for a walk in your yard or neighborhood. Mark your start with an X and write 'start' or 'home'

As you walk, record what you see!

Do you see other houses? Can you see plants of different shapes or sizes?

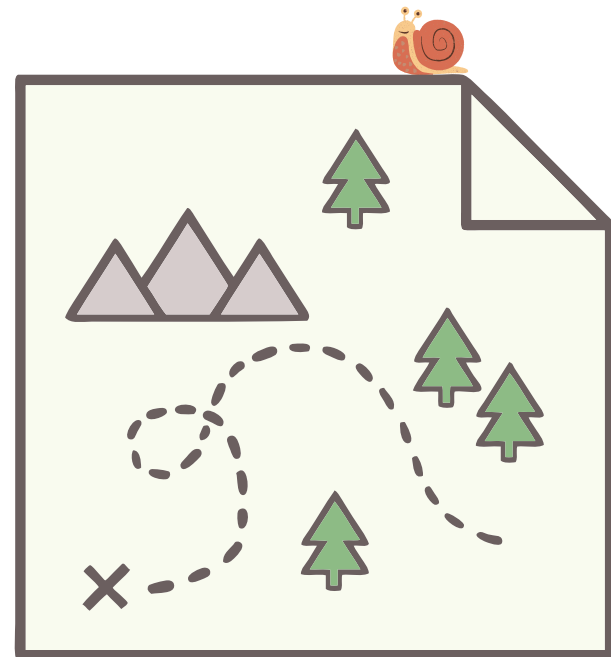

Try to draw what you see as if you were trying to show someone else your habitat.

Record where you notice food, water, shelter, and space using either words or pictures.

Add color and details to your map.

Before you begin, predict:

What organisms do you think share your habitat?
